

# Biomimetic Restorative Dentistry

## Level I : Techniques and Foundation

## COMING TO A CITY NEAR YOU

### Training Coverage

This course covers the following training modules and techniques:

- Polymerization Shrinkage and Stress | *Hands-on*
- Stress Reduced Direct Techniques (SRDTs) | *Hands-on*
- Semi-direct Restorations
- Supra-gingival Adhesive Inlay & Onlay Preparation Design
- Immediate Dentin Sealing (IDS) and Biobase | *Hands-on*
- Deep Margin Elevation (DME) | *Hands-on*
- Provisionalization Techniques
- Biomimetic Cementation Technique | *Hands-on*
- Adhesive Build-up Techniques (Including Endo Treated) | *Hands-on*
- Peripheral Seal Zone and Caries Removal Endpoint
- Isolation Tips & Techniques | *Hands-on*

### Instruction Areas

The techniques and science covered in this course are categorized into the following instruction areas:

- 1 Structural Analysis
- 2 Caries Removal Endpoint/Peripheral Seal Development
- 3 Immediate Dentin Sealing/Resin Coating
- 4 Stress Reduction
- 5 Maximizing Bonds
- 6 Restorative Materials and Preparation Designs

### Learn How To

- Perform more conservative restorative dentistry for your patients using advanced adhesive techniques
- Restore teeth with bonded supra-gingival restorations rather than crowns
- Increase your bond strengths by 400%, making your restorations extremely secure
- Preserve pulp vitality & reduce root canals by over 90%
- Restore badly damaged teeth with adhesion
- Prevent stained and leaky restorative margins
- Eliminate catastrophic failures, and Eliminate post-operative pain & sensitivity

### Class Schedule

#### Chicago, IL: August 8-9

Level I: Techniques and Foundation of Biomimetic Restorative Dentistry

#### San Jose, CA: September 26-27

Level I: Techniques and Foundation of Biomimetic Restorative Dentistry

#### Manhattan, NY: November 14-15

Level I: Techniques and Foundation of Biomimetic Restorative Dentistry

#### Beverly Hills, CA: December 3-6

for Levels I & 2 Complete Training

#### Miami, FL: February 27-28, 2021

Level I: Techniques and Foundation of Biomimetic Restorative Dentistry
